**Protect your most important moments,
Your most important work.**

Whether you are a professional photographer, a small business or a parent, we place a great deal of faith in digital media. From our most vital work documents, to pictures of our children, we store massive amounts of information important to our lives on computer hard drives, SD cards, memory sticks and mobile devices. When these devices fail, restore your faith and recover all of what is important to you. OPTiMO Digital Forensics, a leader in Digital Investigation, eDiscovery and Litigation Support, will protect your work and, more importantly, the moments of your life that are most important.
