

Mobile Forensics

YOUR CASE IN THEIR POCKET

We carry ourselves everywhere - physically and digitally. As more and more people integrate their lives into mobile devices, they are creating a cache of Electronically Stored Information (ESI) that may be the deciding factor in any manner of legal action. Every phone number entered and email exchanged on a BlackBerry™. Every text conversation and web page browsed on a Droid™. Every picture and app, such as Facebook or a game, used on an iPhone. In Mobile Forensics each of these actions, and the manner in which we perform them, reveal who we are as digital beings. That digital personality can be discovered and investigated by OPTiMO Digital Forensics' expert analysts with cutting edge tools, in a state-of-the-art laboratory. The mobile ESI evidence they obtain may be the key to your case.
