

Secure your files & documents in the Cloud - and access them easily from anywhere.

## Overview

OPTiMO Cloud Files provides an API-based file storage solution designed to allow secure storage and retrieval of data from anywhere with Internet connectivity. Files are securely stored in encrypted format and are accessible via SSL-encrypted API calls. Customers can create multiple storage accounts, each with its own administrative password, allowing the creation of isolated file stores. Each account can be configured to store up to 10 TB of data.

## FEATURES & BENEFITS

- Access and management of the Cloud Files accounts through the Cloud Administrative UI and Open API
- Ability to set storage quotas and control sub-administrator access on a per-account basis
- Data stored with 256-bit encryption at rest and 128-bit SSL encryption while in motion
- Fully-functional API provides ability to programmatically and securely access the Cloud Files accounts from anywhere on the Internet
